

QUALITY POLICY

At East Coast Generators, our main focus is our customers and the delivery of high quality products and services.

We strive to meet all customer, regulatory and company requirements through established and effective business management practices.

We are committed to satisfying customer needs, while controlling and optimizing quality when considering risks, costs and benefits.

We undertake our business activity with a committed team of qualified personal that take the time to communicate with all external stakeholders and who strive to meet the demands of our high standards

We will:

- provide products which meet the contractual requirements of the customer and all applicable regulatory authorities.
- conform to customers' site requirements and objectives
- ensure all personnel are conversant with ECG, customer and regulatory requirements
- ensure continued effectiveness of the services provided through the promotion of a uniform approach to quality and maintenance of procedures
